

## GREENHOUSE AND SUMMERHOUSE TREATMENT

The treatment we use on all our buildings is called “Premium Alton Beech” and it has been in use since 1999 on the Summerhouses and since the end of 2002 on all our Greenhouses.

It’s a water-based treatment, which contains wax to help disperse rainwater, whilst enriching and protecting the timber.

It is an industrial treatment that is not available in the shops.

We are able to supply cans of treatment direct to owners who wish to re-treat their buildings.

Coverage depends on many different factors including moisture content and cleanliness of the timber but a rough guide to help you is given below. We are able to supply in cans containing 2.5 or 5 litres and the usage is based upon two coats.

<b>Cedar Greenhouses</b>	All models up to 20’ long.	2.5 litres
	8 x 8 & 8 x 11 Octagonal models.	5 litres
<b>Cedar Summerhouses</b>	All models with Felt Roof.	5 litres
	All models with Cedar Roof	5 to 7.5 litres
<b>Redwood Summerhouses</b>	All Models	5 litres

<b>PRICES</b>	<b>2.5 litres Premium Alton Beech</b>	<b>£25.00</b>
	<b>5 litres Premium Alton Beech</b>	<b>£45.00</b>

**All prices include VAT and Delivery. Please allow 7-10 working days for delivery.**
