

## 19mm Log Specification

As part of our latest manufacturing processes our 19mm logs are simple to put together and are both incredibly sturdy and lightweight. Finished with our unique Georgian styling they look fantastic too. (NB: All 19mm cabins are supplied as standard with perspex glazing and 12mm tongue and grooved floors and roofs.)

## doors & window options

Almost every cabin within the 28 and 44mm ranges can be modified to fit the door and window type or style of your choice from the options listed below. Consult your local price list for details of the cost of changing door and window types and styles. Please note that unless specified your cabin will be supplied with the standard style of doors and windows for that range as illustrated in the main photograph.

## other extras

deck extension

28mm 44mm

Add a new dimension to your cabin with a sturdy & functional Floor Deck Extension.

**Features:** each 5ft deep deck sits on tanalised heavy duty (44x57mm) bearers finished with high quality tanalised decking boards (28x120mm)

\*Deck Extensions can be fitted to the front OR the side of most cabins.

shingles

Finish your log cabin in style with the addition of high quality felt shingles. Available in four fantastic colours: Green, Red, Brown or Grey.

NB: Roof Shingles are available as an additional extra, as standard rolls of green mineral felt are supplied with all cabins.

## Bespoke Cabin Design

We are able to offer an exclusive bespoke cabin design and manufacturing service. For full details please provide a diagram of the building in which you are interested, or the existing building that you would like to customise. We will come back to you with a quote tailored to your specification.

## General Specification

Log Thickness: 19mm, 28mm or 44mm | Roof: 45x120mm roof purlings support 19mm planed tongue and grooved roof boards | Green mineral felt is supplied as standard with all log cabins within the range. Decorative felt shingle roofing is available as an optional extra. | Floor: 44x57mm tanalised (pressure treated) floor bearers are spaced at 400mm centre's (as is standard in most houses). These bearers support heavy duty 19mm planed tongue and grooved floor boards. | Doors & Windows: Joiner made doors and windows are supplied fully glazed or fully boarded. External doors are fitted with mortice locks as standard. | Treatment: Apart from the floor bearers, all cabins are supplied completely untreated. It is strongly recommended that the buildings are treated inside and out with a high quality spirit based preservative within 14 days of installation, weather permitting.

**Features:** half glazed georgian double doors in side (length) alongside a 9-pane georgian opening window.

## 28mm & 44mm Log Specification

As standard all of the logs we use in our cabins are high quality interlocking boards constructed with tongue and groove joints.

Combined with our unique 4-way chamfered notch system this ensures a perfect fit for each and every log within your building keeping the elements out and the warmth in on all of our 28mm and 44mm cabins.

The entire range of 28mm and 44mm log cabins come professionally draft sealed throughout making them water tight and incredibly insulated, saving you on excessive heating costs and greatly reducing the impact on our environment.
